

PORTAS: Prevention of Online Recruitment into Human Trafficking using Automated Solutions

Agenda

- **Project Overview**
 - Why is research on recruitment important?
- **Project Design**
 - How do we see recruitment take place?
- **Case Study**
 - Examples of what recruitment could look like
- **Analysis**
 - Future automated solutions to disrupt recruitment
- **Q & A**

"Authorities arrested 38 traffickers (seven in Moldova); seized 19 vehicles, weapons, phones, and approximately €100,000 in cash; and froze 11 bank accounts. The **transnational trafficking ring**, set up by a Romanian national living in France, smuggled at least **40 Moldovan citizens** to France to exploit them in the construction sector. The illegal profits from the trafficking scheme totaled nearly **€14 million**."

2021 US TIP Report

Prosecution | Protection | Prevention

Overview

- PORTAS focuses on the development of artificial intelligence techniques for the detection, investigation and potential disruption of organised criminal group activity who use online job recruitment platforms.
- PORTAS builds on a pilot study, “Supporting sustainable development in LMICs: a pilot study on human trafficking and organised crime in Moldova”

Design

- Research Question: How can artificial intelligence and other data-driven solutions disrupt OGCs in recruitment and trafficking of victims online?
- Project Partners:
 - HAROD Global Investigation
 - La Strada International
 - Law Enforcement Agencies from Romania, Moldova and Netherlands

Victims of human trafficking are recruited from a wide range of employment sectors.
